Attic - a fresh approach to vintage

With a fresh and pretty aesthetic, the Attic Collection expands our Vintage concept, giving you more inspiration for creating "brand new" vintage display fixtures.

Featuring a variety of Proportion London body shapes, we have experimented with coverings, highlighting aged linen and rips (in a vast array of colours), ticking and silk velvet. We have also developed a double layered lace covering, worn vintage floral and decoupage finishes (all of which can be produced to your unique specification). In addition, you are welcome to supply your own new or vintage fabric.

We can further customise your design with the addition of own brand stencils, upholstery tacks, garment labels and aged ribbon or trims.

Wooden bases, neckcaps and finials can be completed in a variety of paint finishes or stains. Metalwork pieces can be left raw, powder coated or "chipped" to give an age-worn effect, making every item truly unique to each customer.

We show here, only a small selection of our many base, neck cap and body shape possibilities, leaving the potential for you to create a custom design, whether full-size, miniature, male, female or junior size.
